FERTILIZER SPREADERS - PLASTICIZED

- Fertilizer spreader (RG) is intended for spreading dry fertilizer and granulated fertilizer.
- It is constructed to enable uniform distribution in the entire width, and separately on the left and right sides.
- A special attachment can be mounted on the spreader, enabling spreading in 4 lines with the regulation of line width.
- The spreader can also be used for sowing wheat and other crops, as well as salt spreading in winter conditions.
- The spreader can be made of plastic or stainless steel.
- We also offer 300 liter RGP with a plastic funnel and stainless steel disc.
